**TATA** INTERNATIONAL LIMITED

**A HANDY GUIDE  
TO HAPPY FEET.**

No one gets anywhere in uncomfortable shoes! The better you treat your feet, the higher they climb and further they go for you.

Happy feet are better at negotiating the thorny path to success. These innovative, ergonomic-friendly shoes are our way of wishing you all the very best!

## DESIGN:

Our wide range of footwear is designed as per UK footwear standards for a comfortable fit. The shoes are designed keeping in mind the shape and structure of different kinds of feet so that each shoe has enough space for the feet to breathe and stay comfortable all day. Classic style lines ensure that our shoes never go out of fashion.

## MATERIALS:

Leathers for our shoes are sourced from eco-friendly suppliers. The materials used in the uppers and linings are all tested to ensure that they are free of harmful chemicals. Breathable lining materials inside the shoes make them more comfortable for prolonged usage.

## SOLE:

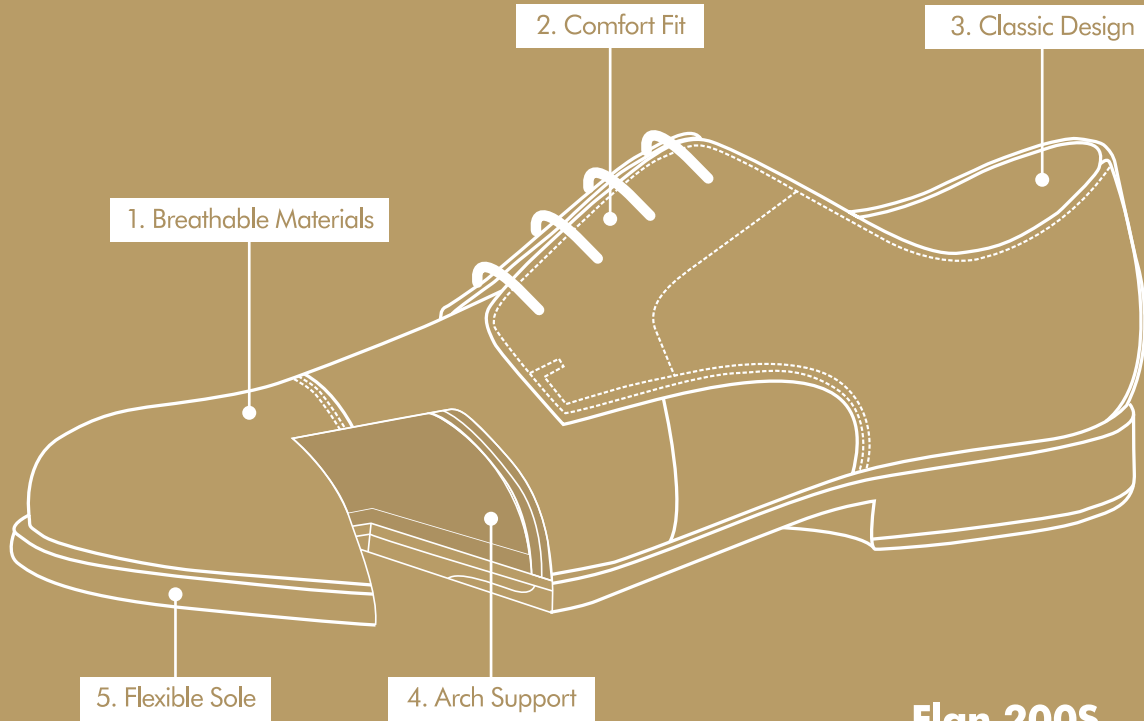

We believe that a sole is the soul of a shoe. That's why all our soles are tested for wear and tear, as well as slip resistance. Vertical and horizontal flex lines in the soles allow easy movement of feet in all directions. Our soles also have good grip to ensure stability on various types of surfaces. The ladies will be pleased to know that the heels of all our women's shoes have stable heel construction for all heel heights.

For customisation options, get in touch with us.

**"GOOD  
SHOES  
TAKE  
YOU  
GOOD  
PLACES."**

# LOOK AFTER YOUR FEET.

Your feet do so much every day. Keep them clean, look after them well and that employee of the year award won't be too far off.

Wash and dry your feet every day at bed time, especially in between your toes.

---

Never wear shoes that are too tight or too loose.

Keep your toenails short at all times. Ingrown toenails will have you crying like a baby.

---

If your feet sweat too much, sprinkle talcum powder on your feet, before putting your shoes on.

Every day, after your shift, give your feet a quick check for shoe bites, itchy areas, cuts and blisters. And attend to them immediately.

---

Your feet feel better when you aren't wearing shoes. Go barefoot whenever possible, and wash them with warm water and soap once you're back.

# LOOK AFTER YOUR FEETSCIENCE®.

Your FeetScience® are carefully made of durable and breathable material. They're ready to take quite a beating but a little love and care will only make them work harder and better.

Air your FeetScience® once in a while.

If you drop food or liquids on your FeetScience®, make sure you wipe them immediately with a piece of cloth.

Always wear socks with your FeetScience®.

Simple wax polish for leather shoes and a mildly damp cloth for synthetic shoes are all you need to get your FeetScience® looking new again.

# FeetScience®
